

**XPRIZE
CANADA
HUB**

Fellowship Description

Fellowship Opportunity: Executive VP Research Assistant - Food, Water, and Waste Domain

Overview: The XPRIZE Canada Hub, in partnership with the XPRIZE Foundation, is seeking a highly motivated fellow to work alongside the Executive Vice President of the Food, Water, and Waste domain area. This unique opportunity will allow the fellow to contribute to the development of a comprehensive domain roadmap, focusing on innovative and sustainable solutions for the future of agriculture, water, food supply, and waste management.

Skills and Experience:

- Strong research and analytical skills to help develop well-informed strategies.
- Excellent written and verbal communication skills for effective collaboration.
- Ability to think creatively and strategically to overcome challenges and barriers.
- Keen interest in sustainability, environmental science, or related fields.
- Prior experience in project management or related activities is a plus.

Project Overview: The fellow will assist in landscape analysis and ecosystem pipeline research. For 2026, topics to be researched include: blue food, textiles circularity, the future of water innovation, and waste management systems.

Fellowship Activities/Tasks:

- Conduct thorough research on current trends and future projections in the relevant fields.
- Collaborate with domain experts to gather insights and data.
- Collaborate across the FWW Domain, prize design, and ecosystem pipeline development.
- Assist in the creation of documents and presentations to communicate findings.
- Participate in brainstorming sessions and workshops to define challenges and opportunities.
- Create visuals to assist in the development of a vision, needs, gaps, and strategy framework.
- Identify key opportunity areas and gaps that need to be filled that could connect to future prize ideas.

Learning Outcomes:

- Gain hands-on experience in strategic planning for large-scale environmental projects.
- Develop a deep understanding of the complexities and interdependencies within the Food, Water, and Waste domains.
- Learn from leading experts in the field and build a professional network.
- Contribute to a visionary project with the potential to make a significant global impact.
- Develop independent project management skillset.
- Learn to communicate scientific information to a range of audiences.
- Develop skillset in divergent and convergent thinking to tackle large problem set areas.

This fellowship is designed for individuals who are passionate about shaping a sustainable future and eager to make a tangible difference in the world. If you are ready to take on this challenge, we look forward to receiving your application.
